

CTF-AllYourW00t.

This is my attempt at making a much cleaner built and sleeker looking version of the original.

I've kept the layout as close to the original map as possible while adapting parts to provide more cover and alternative routes. Regular w00t players will find plenty familiar about the map and hopefully notice some changes for the better.

With thanks to Jackal and his 24/7 w00tabulous server (with many and varied w00t remix maps) that gave me both the inspiration to make this and many hours of heart stoping instaspam action. With regret I add now that the 24/7 Extreme W00tabulous server is no longer running. The good news though, is the bug has bitten me so bad, that I've now gone so far as to set-up my own server 24/7- See SabbathCat.com/ut for more info.

Thanks also to Texas-Gtar for playing this through and having the idea about the mop.

Changes in this second release are mostly visual, though AI, weapon placement and all new secret bits have been added to the mix.

Thanks to all who posted useful comments at UnrealPlayground.com - without you guys it'd not be possible. :)

Installation : Stick the .unr in your maps directory.

Play and have fun!

Credit to GunSlinger and DBF clan for creating one of the most popular map this side of AndAction and to SabbathCat for 100% new brushwork custom textures/models/scripts. (C)SabbathCat 2005.
